

I love listening to XM radio. There is always a channel that has exactly what I want. Just last night the skies looked threatening so I was able to turn to our instant traffic and weather channel and hear a forecast right away. On a regular FM channel who knows how long I would have had to wait. This is why I choose to pay for these services. I do not think someone should get to dictate what I am permitted to hear, especially if I am paying for it. I urge you to please reject the NAB's petition 04-160.

Sincerely,

Kristen Trice
